10/100/1000M Media Converters

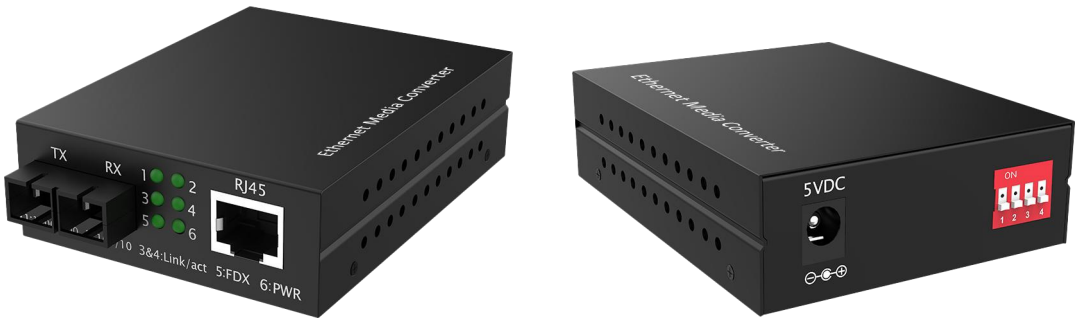

Enhanced Function with Dip switch

LT-MC80G-SC Series

Overview:

LT-MC80G-SC enhanced function series are the 10/100/1000Mbps adaptive Gigabit Ethernet media converter which adopt switching technology to fulfill media conversion. It complies with IEEE802.3, IEEE802.3u, IEEE802.3z and IEEE802.3ab standards. They provide media conversion between 10/100/1000Base-T and 1000Base-SX/LX interfaces such as multi-mode LC/SC connectors (220m / 550m), single-mode LC/SC connectors (20//40/60/80/100km) and single fiber connectors (WDM, 20/40/60/80km) for various fiber optic applications, which can be widely used in powerful solution for FTTX projects. The key function of enhanced series are supporting LFP, network storm suppression, forcing the electrical port and fiber port on 100M，which can meet with the different application requirement.
